

# MEET CATOCOIN

> **CatoCoin is the most-innovative Masternode/POS coin created to date. Utilizing its revolutionary patent-pending technology, CatoCoin solves the problems of unsustainable ROI% and long term viability.**

Other coins have tried and failed to solve these problems in various ways such as initially offering high block rewards, which leads to an oversupply of coins, or by offering low ROI, which deters potential investors.

CATO succeeds where other coins have failed by way of their patent-pending NextGen Technology Masternodes, which is one of the reasons CATO was listed on CoinMarketCap in just 45 days.

## What are NextGen Technology Masternodes?

**In a word; Innovation.**

By developing revolutionary algorithms, known as 'NextGen Technology' CATO has disrupted the status quo where every coin is simply a clone of another. NextGen Technology allows CATO to adjust rewards and collateral without requiring wallet updates, additional collateral, deactivating Masternodes, or forking the blockchain.

CatoCoin is the only Masternode coin in the world which can guarantee an ROI% by increasing collateral

incrementally as nodes join the network. The amount of CATO produced in each block also rises with the node count, but at a lower percentage than the collateral increase, therefore alleviating early-adopter advantage, dramatically lowering the risk of centralization, and reducing the effective emission rate.

## CATO Opens the Market to Non-technical Investors

CatoCoin understands that a significant obstacle to potential investors is the lack of cryptocurrency technical knowledge. In fact it's likely only a very small minority will understand the difference between CATO and other Masternode projects. So CATO is removing barriers and enhancing value by way of innovative offerings such as their 'Investor Portal', 'CatoCasino', and the 'Masternode Exchange'.

CATO's revolutionary Investor Portal makes their NextGen Masternodes available to anyone, regardless of their technical ability. This portal simply requires investors to send a Wire Transfer or Cheque to CatoCoin platform HQ. CATO is then purchased on an exchange, the NextGen Masternode is created, and a CatoCoin Portal Account is set-up for the investor to view their CatoCoin wallet, all without the investor lifting a non-technical finger! By removing the need for this technical knowhow, the CATO team eliminates all non-monetary roadblocks to investing in cryptocurrency, making CATO available to the world!

CATO has partnered with one of the world's leading suppliers of online gaming to develop the CatoCasino, which is due for release in Q4 2018. The CatoCasino allows patrons to make wagers solely using CATO, thereby increasing demand and creating scarcity for CATO.

The CatoCasino will have numerous games to engage all types of users. Given the fact that the online gambling industry is forecasted to be a \$60 Billion market by 2020, they shouldn't be lacking in participants.

In addition to the CatoCasino and Investor Portal, CATO will be launching a Masternode Exchange where owners will be able to buy and sell existing NextGen Masternodes (with initial collateral requirements) on the CatoCoin Network. This allows investors to realize the full value of their Masternode, rather than selling CATO as individual coins.

Make no mistake, the CATO team is laser-focused on innovative solutions that will increase demand and generate maximum returns for CatoCoin investors!
